* To complete the PIE, students must take one entrepreneurship course from each of four categories and earn a minimum total of nine credit hours. All courses must be taken for a grade, unless the course is only offered Pass/Fail (e.g. ENTR 407 Entrepreneurship Hour). If a student takes two core courses, one may count as an elective course. In most cases, it is possible to double-count one course between a concentration plan and the Program in Entrepreneurship. However, it is the student's responsibility to check with his academic advisor regarding the rules for double-counting.
